Purpose

This brag sheet is a master accomplishment document for recommendation letters, scholarships, fellowships, graduate school opportunities, internships, research programs, and professional applications. It gives a fuller picture of my academic background, technical projects, research experience, leadership, service, awards, and long-term goals.

Education

Emory University Aug. 2026 – May 2028

M.S. Computer Science *Atlanta, GA*

- Incoming graduate student with interests in AI, human-computer interaction, VR/XR, computer vision, educational technology, and applied computing research.

Morgan State University Aug. 2022 – May 2026

*B.S. Computer Science, GPA: **3.772** (4.00 scale), Magna Cum Laude* *Baltimore, MD*

- **Honors:** Magna Cum Laude, Dean's List for **7 semesters**, TEACH Grant Recipient, SCMNS Graduating Senior Honors Recognition.
- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Software Engineering, Computer Networks, Database Design, Cybersecurity, Computer Graphics, Mobile App Design and Development, Game Design and Development, Linear Algebra, Applied Probability and Statistics.

Profile Summary

I am a Computer Science graduate from Morgan State University and an incoming M.S. Computer Science student at Emory University. My work focuses on full-stack development, AI-supported user experiences, virtual reality, human-computer interaction, educational technology, and accessible computing. I enjoy building software that is interactive, useful, and meaningful for real users.

Research Interests

Human-computer interaction; virtual reality, augmented reality, and extended reality; conversational AI; educational technology; accessible computing; AI-supported user experiences; computer vision; brain-computer interfaces; full-stack AI applications; responsible and user-centered technology.

Research Experience

Human-AI eXperience (HAX) Lab May 2025 – May 2026

Undergraduate Researcher | Lab Director: Dr. Naja A. Mack *Baltimore, MD*

- Conducted research and development across AI, VR/XR, HCI, educational technology, and interactive systems.
- **Led** *Icon History*, using **Flask, JavaScript, Claude API, and UI/UX design** to develop an interactive museum with **7 rooms**, **9 mini-games**, and **2 AI chatbots**.
- **Developed** *Lyris*, an AI music and poetry companion with **6 integrations**, including Spotify, Genius, TTS, image/song generation concepts, and voice input, using **Next.js, TypeScript, Claude API, and Firebase**.
- Developed and evaluated *Collision Course*, a VR concussion simulation using **Unity, C#, and JSON** with **30 screens**, **2 quiz flows**, **2 scenarios**, and user testing with approximately **5 to 6 users**.
- Mentored **1,500+** middle and high school students through CodeBears, developing mBot, computer vision, and machine learning lessons to expand STEM exposure for Baltimore youth.
- Supported the **Inaugural HBCU Brain Drone Race** through logistics, drone testing, calibration, validation, and backup operator training, helping expose **250+** attendees to BCI technology.

Teaching Experience

Teaching Assistant Jan. 2026 – May 2026

COSC 459: Database Design *Baltimore, MD*

- Guided **38** students through ER modeling, normalization, SQL, DDL/DML, relational schema design, and database coursework.
- Led review sessions, provided feedback on assignments, and supported students with zyBooks readings, participation activities, and zyLabs.
- Helped reinforce database design best practices, course expectations, and implementation skills, contributing to an **84%** grade average.

Major Projects

SENTINEL Presidential Decision Support System Jan. 2026 – May 2026

Python, React, Vite, Google Cloud, FRED API | GitHub

- Worked on a **5-person Agile team** to build a presidential briefing and decision support system.
- Unified team features into a demo-ready system by building **7 of 37 AI agents**, a **live threat dashboard**, and a **global radar map**.
- Developed economy-related agent features using REST API data sources and economic indicators.
- **Brag Point:** Shows ability to work on complex AI systems, coordinate in a team, and build software for real-time analysis and decision support.

SocialSense AI Jan. 2026 – Apr. 2026

React, Vite, Supabase, Unity, Convai, Meta Quest 3, Web Speech API | GitHub

- Collaborated on a **4-person** team to build a **1st place** AI social coaching platform.
- Built around voice coaching, sentiment review, safe-zone heatmaps, and a **Meta Quest 3** prototype.
- Helped frame the concept around adaptive support, realistic simulations, privacy-first design, and ethical user value.
- **Brag Point:** Connects AI, VR, communication support, emotional awareness, and responsible design.

Collision Course May 2025 – May 2026

Unity, C#, JSON, VR/XR, Meta Quest

- Developed an immersive VR concussion education simulation focused on TBI, CTE, football safety, and medical evaluation.
- Designed interactive educational flows with lecture screens, quiz flows, scenario-based decisions, guided dialogue, and knowledge checks.
- Supported interaction systems for lecture progression, transcript behavior, seated XR experiences, and scenario-based learning.
- **Brag Point:** Combines VR, health education, HCI, and interactive learning into one applied computing project.

Icon History May 2025 – May 2026

Flask, JavaScript, Claude API, UI/UX Design

- Led development of an interactive museum-style experience focused on historical innovators.
- Created a system with **7 rooms**, **9 mini-games**, and **2 AI chatbots**.
- Focused on historical figures such as Marie Van Brittan Brown and Frederick McKinley Jones.
- **Brag Point:** Uses AI and interactive design to make history, representation, and invention more accessible.

Lyris May 2025 – May 2026

Next.js, TypeScript, Tailwind CSS, Claude API, Firebase

- Developed an AI music and poetry companion designed to support creative exploration, music insight, and poetic expression.
- Integrated music, lyrics, voice input, text-to-speech, and AI conversation features.
- Contributed toward a future research paper on AI-assisted creativity and interactive user experience.
- **Brag Point:** Combines creative technology, conversational AI, music, and writing support.

Roar & Rhythm Oct. 2025 – Present

PHP, MySQL, JavaScript | GitHub

- Developed a **full-stack creative platform** for Morgan State's MSU Poet Club community of **100+ members**.
- Built features for content sharing, creative expression, and community engagement.

- **Brag Point:** Shows ability to create campus-centered full-stack software with real community use.

StepX Sneaker Store Dec. 2024 – May 2025

PHP, MySQL, JavaScript, HTML, CSS | GitHub

- Built a full-stack sneaker store with CRUD functionality, product display, cart, favorites, profile editing, reviews, and notifications.
- Implemented database-backed shopping cart features and account-based storage.
- **Brag Point:** Strengthened full-stack development skills with authentication-style flows, database logic, and interactive web design.

AI Powered Financial Assistance Dec. 2024 – May 2025

Expo, TypeScript, Firebase, TensorFlow, OpenAI | GitHub

- Contributed to a **4-person** Agile/Scrum team building a mobile-first financial assistance app for college students.
- Worked on features focused on budgeting, AI coaching, predictive analytics, and credit-management support.
- **Brag Point:** Reflects interest in using AI to support student success and financial decision-making.

CoverCrazy Add Date Here

Next.js, TypeScript

- Developed a web-based interactive album-cover game using a modern frontend stack.
- Worked on interactive features and game flow for user engagement.
- **Brag Point:** Connects music, frontend development, and interactive web experiences.

Leadership and Service

CodeBears Mentor May 2025 – May 2026

HAX Lab Initiatives *Baltimore, MD*

- Mentored **1,500+** middle and high school students through lessons involving robotics, computer vision, and machine learning.
- Helped make technical topics more accessible for Baltimore youth through hands-on STEM activities.

HBCU Brain Drone Race Support 2025 – 2026

HAX Lab *Baltimore, MD*

- Supported a first-of-its-kind HBCU event involving brain-computer interfaces, EEG devices, and drone racing.
- Assisted with logistics, drone testing, calibration, validation, outreach, and backup operator training.
- Helped expand BCI technology exposure to **250+** attendees.

Society for the Advancement of Computer Science Sept. 2023 – Present

General Body Member *Morgan State University*

- Participated in student engagement events, resume preparation, LeetCode practice, and data structures review.

Hackathons and Competitions

PROPEL Center Future of Tech Innovation Challenge Mar. 2026

1st Place Winner

- Won **1st place** for an innovation-focused technology challenge.
- Add the project name, your team size, the challenge prompt, and your exact contribution here.

BE Smart Hackathon Nov. 2025

Unity Game Project

- Built a Unity game on a **5-person team** for an adaptive math platform for middle school students.
- Practiced rapid prototyping, teamwork, pitch preparation, and user-focused design.

MorganHacks 2025: Mind Haven Apr. 2025

OpenAI-Powered Chatbot

- Built an OpenAI-powered chatbot on a **4-person team** focused on mental health support.
- Contributed to a project centered on student well-being and AI-supported conversation.

CRA Research Showcase Add Date Here

Team Lead and Poster Presenter

- Served as team lead and poster presenter.
- Add poster title, research topic, team members, and event details here.

Awards and Honors

1st Place Winner, PROPEL Center Future of Tech Innovation Challenge (Mar. 2026); **SCMNS Graduating Senior Honors Recognition** (May 2026); **Magna Cum Laude** (May 2026); **Dean's List** (7 semesters, Spring 2023 – Spring 2026); **TEACH Grant Recipient**; **NSBE 2026 Attendee**; **ColorStack Member**.

Publications and Writing

Enrollment Support and Student Service Experience Research Ongoing

Morgan State University

- Documented observations and service-flow issues connected to student support systems such as Bear Essentials, QLess, Morgan Gateway, and Self Service Banner.
- Produced structured research writing in LaTeX using ACM formatting conventions.
- Explored how student-facing systems affect access, clarity, service quality, and user experience.

Future Research Directions Ongoing

AI, HCI, VR/XR, Educational Technology

- Preparing project work for possible research papers, posters, demonstrations, and conference submissions.
- Strongest current research directions include *Collision Course*, *Icon History*, *Lyris*, and student service experience research.

Extracurricular Activities

Hackathons: BE Smart 2025, MorganHacks 2025/2026; **CRA Research Showcase:** Team lead and poster presenter; **SACS:** Member; **NSBE:** Member, 2026 attendee; **ColorStack:** Member.

Technical Skills

Languages: Python, Java, C#, JavaScript, TypeScript, PHP, SQL, HTML/CSS, Kotlin
Frameworks/Tools: React, Next.js, Flask, Expo, Vite, Unity, Node.js, Docker, Git, GitHub, VS Code, MAMP, Android Studio, Google Colab, Overleaf, LaTeX
Databases/Cloud/APIs: MySQL, Firebase, Supabase, Google Cloud, OpenAI API, Claude API, FRED API, Linux/Bash
Areas: Full-stack development, virtual reality development, conversational AI, database design, user-centered design, usability testing, mobile app development, computer vision, educational technology, technical writing

Recommendation Letter Highlights

Recommenders may emphasize my academic growth, research potential, ability to build interdisciplinary projects, persistence when learning complex tools, technical communication skills, mentoring experience, and interest in AI, HCI, VR/XR, educational technology, and applied computing.

- Strong examples include my undergraduate research in the HAX Lab, leadership on *Icon History*, development work on *Collision Course* and *Lyris*, TA work in Database Design, CodeBears mentoring, and support for the HBCU Brain Drone Race.
- My work shows a pattern of building technology that supports learning, creativity, accessibility, and real-world user experience.
- My strongest qualities include persistence, curiosity, communication, adaptability, project ownership, and willingness to learn new tools through hands-on problem solving.

Personal Statement Notes

My journey reflects persistence, technical growth, and a desire to use computing to create meaningful experiences. I am interested in projects that do more than demonstrate technical ability. I want to build systems that help people learn, communicate, create, and access information in better ways. Through my work in VR, AI, full-stack development, computer vision, and educational technology, I have developed as both a programmer and an emerging researcher.

Future Goals

- Strengthen graduate-level research experience in AI, HCI, VR/XR, computer vision, and applied computing.
- Publish or present research related to immersive learning, concussion education, AI creativity tools, interactive historical experiences, or student support systems.
- Build stronger technical depth in machine learning, software engineering, computer vision, and research methods.
- Continue developing projects that combine creativity, technical skill, social impact, and user-centered design.
- Pursue internships, fellowships, scholarships, and research opportunities connected to AI, software engineering, and human-centered technology.

CRA Research Showcase Poster: Add poster or presentation link here.

Information to Add Later

- Exact project repository links for Collision Course, Icon History, Lyris, CoverCrazy, and Brain Drone Race materials.
- Exact PROPEL project title, team name, challenge prompt, and personal contribution.
- Names of mentors, supervisors, and professors connected to each project.
- Research posters, papers, abstracts, and conference submissions.
- Screenshots, demo video links, and deployed website links.
- More measurable impact, such as users tested, students reached, attendees reached, awards, acceptance rates, or presentation audiences.
- Stronger descriptions of exact role in team projects.
