Education

Emory University — Expected May 2028
M.S. Computer Science — *Atlanta, GA*

Morgan State University — May 2026
*B.S. Computer Science, GPA: **3.8** (4.00 scale), Magna Cum Laude* — *Baltimore, MD*

Technical Skills

Languages: Python, Java, C#, JavaScript, TypeScript, PHP, SQL, HTML/CSS, Kotlin
Frameworks/Tools: React, Next.js, Flask, Expo, Vite, Unity, Node.js, Docker, Git, GitHub, VS Code, MAMP
Databases/Cloud/APIs: MySQL, Firebase, Supabase, Google Cloud, OpenAI API, Claude API, Linux/Bash

Experience

Morgan State University — Baltimore, MD
Developer, GUARD Project — CEAMLS / TRAILS — PI: Dr. Valerie Riggs — *Jun. 2026 – Sep. 2026*

- **Built** a **9-section** site (**HTML, CSS, JS, Flask**) for *GUARD*, NSF-funded AI bias research, achieving a **95/100** accessibility score and cutting bias-flagged responses from **51% to 0%**, toward a paper and Morgan State feature.

Teaching Assistant, Database Design — Department of Computer Science — *Jan. 2026 – May 2026*

- Guided **38** students through ER modeling, normalization, and SQL (DDL/DML), led review sessions, and provided feedback on database schema design and coursework, contributing to an **84%** grade average.

Human-AI eXperience (HAX) Lab — May 2025 – Present
Research Assistant — Lab Director: Dr. Naja A. Mack — *Baltimore, MD*

- **Led** *Icon History*, using **Flask, JavaScript, Claude API, and UI/UX design** to develop an interactive museum with **7** rooms, **9** mini-games, and **2** AI chatbots, currently being prepared for usability testing.
- **Developed** *Lyris*, an AI music and poetry companion with **6** integrations (**Spotify**, **Genius**, TTS, image/song gen) and **voice input**, using **Next.js, TypeScript, Claude API, and Firebase**; contributing toward a future research paper.
- Developed and evaluated *Collision Course*, a VR concussion simulation using **Unity, C#, and JSON** with **30 screens**, **2 quiz flows**, **2 scenarios**, and **unit testing** with **6 users**, currently being prepared for usability testing.
- Mentored **1,500+** middle and high school students through CodeBears, developing mBot, computer vision, and machine learning lessons to expand STEM exposure for Baltimore youth.
- Supported the **Inaugural HBCU Brain Drone Race**, a historic first-of-its-kind HBCU event, through logistics, drone testing, calibration, and backup operator training, expanding BCI technology exposure to **250+** attendees.

Projects

SENTINEL Presidential Decision Support System — Jan. 2026 – May 2026
Python, React, Vite, Google Cloud, FRED API | GitHub

- Unified a **5-person Agile team's** features into a demo-ready presidential briefing system by building **7 of 37 AI agents**, a **live threat dashboard**, and a **global radar map**.

SocialSense AI — Jan. 2026 – Apr. 2026
React, Vite, Supabase, Unity, Convai, Meta Quest 3, Web Speech API | GitHub

- Collaborated on a **4-person** team to build a **1st place** AI social coaching platform using **React, Vite, Supabase, Unity, and Convai**, with voice coaching, sentiment review, safe-zone heatmaps, and a **Meta Quest 3** prototype.

Roar & Rhythm — Oct. 2025 – Present
PHP, MySQL, JavaScript | GitHub

- Developed a **full-stack creative platform** for Morgan State's MSU Poet Club community of **100+ members** using **PHP, MySQL, and JavaScript** to support creative content sharing and engagement.

StepX Sneaker Store — Dec. 2024 – May 2025
PHP, MySQL, JavaScript | GitHub

- Built a **full stack sneaker store** using **PHP, MySQL, JavaScript, HTML, and CSS** with **CRUD**, **4 core features** including cart and favorites, and dynamic account-based storage.

Awards

1st Place Winner, PROPEL Center Future of Tech Innovation Challenge (Mar. 2026); **SCMNS Graduating Senior Honors Recognition** (May 2026); **Dean's List** (7 semesters, Spring 2023 – Spring 2026)
